

Basic Data Visualization Project in Tableau

Name

Divya Dharshini

Internship

iNeuBytes Data Science Internship

Task

Task 1 - Basic Data Visualization Project in Tableau

Objective

To analyze the superstore dataset using Tableau and create visualizations that help understand sales and profit trends.

Dataset Used

Sample Superstore Dataset

Tool Used

Tableau Public

Visualization Created

- Combined all visualization into one dashboard.
- Added an interactive filter using “Using as Filter.”
- Included chart titles and labels.

Key Findings

- Technology has the highest sales.
- Office Supplies has the lowest sales.
- Ontario has the highest profit.
- Sales decreased from 2009 to 2011 and increased again in 2012.

Conclusion

The Tableau dashboard provides a clear overview of sales performance by category, region, and [year](#). It helps users quickly analyze trends and make data-driven decisions.
